Art Unit: 3748

DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

IN THE DRAWING:

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “*a third control valve providing fluid communication with the internal combustion engine*” and “*providing hydrogen fuel to the internal combustion*” in claim 1, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

IN THE CLAIMS:

3. Claims 1-36 are objected to because of the following informalities: The claims are replete with alternative and unclear language too numerous to mention in every instance. The following are several examples:

-In claim 1, line 13, “*a component selected from HCs, CO or combination thereof*” should be changed to --- *a component selected from any one of HCs, CO, and combinations thereof* ---.

Art Unit: 3748

-In claim 5, line 2, “ *continuously or discontinuously*” should be changed to —*selectively continuous and discontinuous*“.

-In claim 8, line 2, “ *no catalyst capable of oxidizing nitrogen*” should be changed to —*no catalyst for oxidizing nitrogen*“. Appropriate correction is required in response to this action.

Prosecution on the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire TWO MONTHS from the mailing date of this
